

AMENDMENTS TO THE SPECIFICATION

In this response the title has been amended to read:

**~~IMPROVEMENTS IN AND RELATING TO COMMUNICATION METHODS~~[[,]]
~~COMMUNICATION AND SYSTEMS AND TO~~ FOR PERSONAL COMMUNICATION
DEVICES**

This title amendment is reflected in the substitute specification which is submitted with this response. This substitute specification has been amended to include suitable section headings. A redline specification which faithfully reflects the changes which have been made, including the addition of paragraph numbers, is also submitted.

Please amend the abstract in the manner indicated below.

A communication method ~~comprising~~ uses a personal communication device (2), ~~the personal communication device comprising~~ which has a memory ~~[[8]]~~ in which is ~~stored~~ a secret is stored, and which is adapted to communicated with a digital device ~~[[16]] capable of communication with the personal communication device (2), the method comprising the steps of establishing communication~~. Communication between the personal communication device ~~[[2]]~~ and the digital device ~~[[16],]~~ is established and providing the secret from the personal communication device (2) to the digital device (16) by the digital device requesting the secret from the personal communication device, the personal communication device requesting confirmation from a user that the secret can be provided and providing the secret to the digital device only if the confirmation is provided by the user.
